Subject: Water Resources Committee Vote

John,

The Leon County Advisory Citizens Water Resources Committee, at its meeting on November 7, 2005, based on a quorum of six members present, voted unanimously to support the staff recommendation to move the County's water quality monitoring program supervision and data management activities from Growth and Environmental Management to Public Works. The motion voted upon also included a request by the Committee to to review an annual report of this program's activities and milestones in order to judge its effectiveness, including its sharing of data with other departments and agencies and the use of these data in regulatory and planning activities.

Thank you for your presentation to the committee and your willingness to respond to the many questions and comments that arose during this discussion.

Steve
